PROFILE

Software developer with a frontend engineering specialism and experience delivering responsive websites, CMS integrations and production deployments for remote clients. Builds accessible, maintainable interfaces with React, Next.js and TypeScript, using AI-assisted workflows to accelerate implementation while personally reviewing, testing and validating the resulting code.

CORE SKILLS

React · Next.js · TypeScript · JavaScript · HTML · CSS · Tailwind CSS · Node.js · Sanity · HubSpot CMS · WordPress · Git · GitHub Actions · Vitest · GSAP · Framer Motion · Jotform · Formspree

EXPERIENCE

Freelance Frontend Developer

February 2023–Present · Remote

Independent client work

- Delivered more than 20 paid websites for remote clients, translating supplied designs into responsive, production-ready interfaces.
- Built with React, Next.js, TypeScript and Tailwind CSS; integrated Sanity, HubSpot, WordPress and multilingual content workflows.
- Handled testing, performance optimisation, deployment, DNS configuration and client handover.

Frontend Developer

October 2024–January 2025 · Remote

Lendasat

- Resolved GitHub-assigned tickets across a React product and its user documentation.
- Contributed UI and UX decisions through pull requests, code review and dprint-based formatting.

Frontend Developer and Technical Facilitator

November 2021–January 2023 · Benin City

Genius Hub Global

- Designed lesson plans and taught HTML, CSS, JavaScript and React to more than 100 trainees in group and individual classes.
- Converted the organisation's website to WordPress so staff could manage content independently after handover.

SELECTED WORK

Creele Studios
Built and deployed the complete responsive Next.js website from a supplied design, including full-page navigation, motion, sliders, audio playback and a Formspree contact flow.

creelestudios.com

RawLab Ventures
Converted the complete Figma interface into responsive HubSpot CMS pages, reusable components and two Jotform lead flows.

rawlab.ventures

Skinny Cans
Built and launched the supplied interface with Next.js, multilingual routing, optimised media, deployment and DNS configuration.

skinnycans.com

EnvGuard
Created an open-source TypeScript CLI for validating environment configuration without exposing secret values, backed by 35 automated tests and GitHub Actions.

github.com/itseghosime/envguard

EDUCATION

Bachelor of Engineering in Industrial Engineering
January 2023–August 2026

University of Benin

TRAINING AND CREDENTIALS

- OpenAI Academy · AI Foundations · September 2026
- Tech4Youth · Artificial Intelligence Training · September–December 2026
- TS Academy · Full-Stack Software Development · June 2026–Expected February 2027
- EdoBits · Web Design, Development and Digital Skills · November 2020–September 2021

RECOGNITION

Best Web Graduating Student, EdoBits, 2021.
